FROM: [REDACTED] C.O.

24 October 1965

25X1A

SUBJECT: Barber Shop

TO: [REDACTED]

25X1A

1. An evaluation of the Barber Shop Facility within the [REDACTED] Compound by competent medical authority has led me to the following conclusions.

25X1A

a. It would be difficult to construct a better system for spreading an epidemic of skin disease.

b. No standard of cleanliness exists.

c. The most rudimentary technique and equipment is used with no capability for cleaning and sterilizing between customers.

2. The environment is totally conducive to rampant spread of skin and scalp disease in a hot, humid climate where these diseases present a constant medical problem of control at all times. We are now treating several cases of skin disease and if anyone of these cases were to get a haircut from the native barber it would be hard to predict anything but spread. In addition, [REDACTED] receive haircuts from the same barber, thus magnifying possibilities of disease spread.

25X1A

3. Request: That a modern facility be constructed, supplied with modern equipment, a properly trained barber, in an air conditioned environment. The facility must have running water, hot and cold; sterilizing equipment, and sufficient cutting equipment and linen to allow use of clean equipment, which has been sterilized after each customer and clean linen for each customer. Recommend that a nominal fee be charged for the haircuts. The price if any to be determined by you.

4. In the interim period, I request that instructions in proper barber sanitation be provided, that at least rudimentary cleaning capability be obtained, and that immediate screening of the area be accomplished. In the mean time I have instructed all [REDACTED] personnel to not let the barber use the razor for trimming and that they are to take a shower and shampoo immediately after a haircut.

## Summary

25X1A

### I What was Wrong <sup>PIANNING</sup> Combined Effort

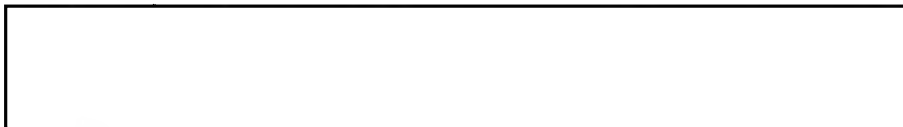

- (1) Backup starter unit improperly positioned on operational sortie
- (2) attitude gyro listed on 7AK could not be found in bit
- (3) one person failed to stop when challenged by guard
- (4) one roll of tape was the wrong kind
- (5) Walk-around bottle dropped
- (6) COMMUNICATIONS

### II Desired changes

- (1) Prefer we do the entire job as other unit do it.
- (2) Less restrictions on personnel going off Base. 21
- (3) Better Communications with Hdqs.

### III What was Right

- (1) Article 342 gave excellent performance - 2 with ups - 8 flights
- (2) Good teamwork between sections

25X1A

- (3) Strong effort by all sections to make mission a success
- (4) Got ready quickly on every move
- (5) Good attitude
- (6) Good job of diverting aircraft + release in Hawaii
